Parish Emergency Assistance Scheme (PEAS)

Salt

Wiltshire Council as part of its ongoing community engagement is looking to help town and parishes across Wiltshire in periods of extreme cold weather.

The Parish Emergency Assistance Scheme allows Wiltshire Council to provide equipment to local town and parish councils to enable them to refill salt bins or spread salt in known areas during periods of adverse weather.

The equipment currently available to councils is as follows:

- 25kg bags of salt
- 'Snow Warden' tabards

There are certain conditions attached with the provision of the PEAS equipment which should be considered should you wish to participate;

- Salt must be kept in a dry secure location with easy access.
- A nominated representative who will be responsible for working with us.
- Develop a parish weather response plan with Wiltshire Council

In return Wiltshire Council asks that you prepare a snow plan outlining how the parish will respond to a cold weather related incident. The plan should outline key personnel, local risks and areas of high priority. The plan will also outline where the PEAS equipment will be positioned, should the situation occur.

Wiltshire Council collates requests for equipment between May and the end of August each year. The standard quantities and differing equipment varies from parish to parish. We are able to provide additional amounts of equipment where a Town or parish can prove that additional equipment is required to fulfil their plan.

For more information please contact the weather team:

Parish Emergency Assistance Scheme (PEAS)

Sand

Flooding is a natural event and no drainage or flood protection system can give absolute protection. Flooding occurs in different ways such as heavy rainfall causing rivers and streams to fill beyond capacity and with nowhere else to go the floodwaters spread into the surrounding land.

Wiltshire Council as part of its ongoing community engagement and flood prevention schemes is looking to help towns and parishes across Wiltshire should floods occur. The Parish Emergency Assistance Scheme allows Wiltshire Council to provide flood equipment to parishes across the county, the standard equipment is currently:

- 25kg bags of sand
- 50 empty sandbags
- 50 gel sacs
- 2 signs
- 2 flood warden tabards

In return Wiltshire Council asks that you prepare a flood plan outlining how the parish will respond to a flooding incident. The plan should outline key personnel, local risks and areas of high priority. The plan will also outline where flooding equipment will be positioned, should the situation occur.

There are certain conditions attached with the provision of the PEAS equipment:

- Sand must be kept in a dry secure location with easy access.
- Additional equipment must also be kept in a secure site.
- A nominated representative will be responsible for working with us.
- Develop a parish weather response plan with Wiltshire Council

Wiltshire Council collates requests for equipment between May and the end of August each year. The standard quantities and differing equipment varies from parish to parish. We are able to provide additional amounts of the standard equipment where a Town or parish can prove that additional equipment is required to fulfil their plan.

Parishes are able to apply for the disposable equipment each year (sand, empty sandbags, gel sacs) if the previous year's stock disposable equipment has been used. The long life equipment such as signs as tabards will not be delivered year after year.
